Taking the Corporate Social Responsibility(CSR)

15 June 2015

Dear business partner,

To achieve sustainable business development, we as a Corporation take our Social Responsibility (CSR) very seriously and make sure that our business activities are in the interests of the general public.

According to our “General Terms and Conditions of Purchase” suppliers also have to comply with the statutory provisions governing the treatment of employees, environmental protection, health & safety at work and to work on reducing the adverse effects of its activities on human being and the environment.

To enhance awareness and knowledge about CSR, improve the CSR level and thereby reduce the probability of harmful CSR issues in our supply chain, Bosch will conduct more CSR activities in the future.

We expect from you, as our key strategic partner, to follow CSR standards and to work together with us for sustainable development. Your engagement is base for our mutual success.

Yours sincerely,

CHENG Daniel-siu-wo
